LEARN
TO RAISE
FUNDS &
MOBILISE
SUPPORT

In a context where:

Governments are increasingly limiting the civic space for Civil Society Organisations (CSOs)

Foreign donors are reducing their funding for development cooperation

More developing countries are growing towards middle income status, while in most countries the gap between rich and poor is at its highest level in 30 years.

We want to:

Increase the capacity of CSOs to raise funds locally

Increase the capacity of CSOs to hold governments accountable and make claims towards duty-bearers

Because we believe this will lead to

A strong local support base, local ownership and bottom-up change, accountability towards the community, legitimacy and sustainability.

Voice for CSOs in decision-making processes and in monitoring the implementation of policies

A more rooted and sustainable civil society that promotes equality and justice

Mobilizing Support

Community organisations require skills and knowledge to claim the community's economic, social and political/civil rights with their authorities.

Advocacy for Change course aims at strengthening the capacity of organisations to adopt to a rights-based approach and help fulfill basic needs where needed and impact skills to influence duty bearers to fulfill their duties.

Local Fundraising (LFR)

The viability or survival of development organisations depends on the Organisation's ability to adapt to the changing donor trends and the willingness to explore alternative sources of funds.

The Local Fundraising course seeks to equip learners with practical skills on how to craft winning strategies of raising resources within their communities.
